### Description

The 250R Series is designed to protect against short duration high voltage fault currents (power cross or power induction surge) typically found in telecom applications (250Vrms). The series can be used to help telecom networking equipment meet the protection requirements specified in ITU K.20 and K.21.

### Features

- 0.08 – 0.18 hold current range, 60VDC operating voltage
- 250VAC interrupt rating
- Fast time-to-trip
- Binned and sorted narrow resistance ranges available
- RoHS compliant, Lead-Free and Halogen-Free\*

### Applications

- Customer Premises Equipment (CPE)
- Central Office (CO)/telecom centers
- LAN/WAN equipment
- Access equipment

### Electrical Characteristics

Items with T at end of part number = pre-tripped device. See Part Ordering Number System section of this data sheet for additional information.

$I_{hold}$  = Hold current: maximum current device will pass without tripping in 23°C still air.

$I_{trip}$  = Trip current: minimum current at which the device will trip in 23°C still air.

$V_{int}$  = Maximum voltage the device can withstand without damage at rated current ( $I_{max}$ )

$V_{op}$  = The device regular operation voltage

$I_{max}$  = Maximum fault current device can withstand without damage at rated voltage ( $V_{max}$ )

$P_d$  = Power dissipated from device when in the tripped state at 23°C still air.

$R_{min}$  = Minimum resistance of device in initial (un-soldered) state.

$R_{typ}$  = Typical resistance of device in initial (un-soldered) state.

$R_{1max}$  = Maximum resistance of device at 20°C measured one hour after tripping.

**Caution:** Operation beyond the specified rating may result in damage and possible arcing and flame.

\* Effective January 1, 2010, all 250R PTC products will be manufactured Halogen Free (HF). Existing Non-Halogen Free 250R PTC products may continue to be sold, until supplies are depleted.

## Temperature Derating

| Part Number      | Ambient Operation Temperature |       |      |       |      |      |      |      |       |
|------------------|-------------------------------|-------|------|-------|------|------|------|------|-------|
|                  | -40°C                         | -20°C | 0°C  | 23°C  | 40°C | 50°C | 60°C | 70°C | 85°C  |

## Average Time Current Curves

## Temperature Derating Curve

The average time current curves and Temperature Derating curve performance is affected by a number of variables, and these curves provided as guidance only. Customer must verify the performance in their application.

## Soldering Parameters - Wave Soldering

|                          |                   |
|--------------------------|-------------------|
| Condition                | Wave Soldering    |
| Peak Temp/ Duration Time | 260°C ≤ 5 Sec     |
| ≥ 220°C                  | 2 Sec ~ 20 Sec    |
| Preheat 140°C ~ 180°C    | 180 Sec ~ 210 Sec |
| Storage Condition        | 0°C~35°C ≤ 70%RH  |

- Recommended soldering methods: heat element oven or N<sub>2</sub> environment for lead-free.
- Devices are designed to be wave soldered to the bottom side of the board.
- Devices can be cleaned using standard industry methods and solvents.
- This profile can be used for lead-free device

**Note:** If soldering temperatures exceed the recommended profile, devices may not meet the performance requirements.

## Physical Specifications

|                                  |  |
|----------------------------------|--|
| <b>Lead Material</b>             | Tin-plated Copper  |
| <b>Soldering Characteristics</b> | Solderability per MIL-STD-202, Method 208E                       |
| <b>Insulating Material</b>       | Cured, flame retardant epoxy polymer meets UL94V-0 requirements. |
| <b>Device Labeling</b>           | Marked with 'LF', voltage, current rating, and date code.        |

## Environmental Specifications
